

[music]

SID: You're going to hear a new, a unique, and I believe, accurate revelation explaining the Mark of the Beast. I can tell you I have never heard this before.

*Is there a supernatural dimension, a world beyond the one we know? Is there life after death? Do angels exist? Can our dreams contain messages from Heaven? Can we tap into ancient secrets of the supernatural? Are healing miracles real? Sid Roth has spent over 35 years researching the strange world of the supernatural. Join Sid for this edition of **It's Supernatural**.*

SID: Hello. Sid Roth here. Welcome to my world where it's naturally supernatural. There are such strange phenomena going on in a supernatural fashion around the world, that I've asked my friend L.A. Marzulli, who has spent the last few years of his life documenting these things. Most people read a little headline, but they don't understand how serious these things are, and what their signs are pointing to. For instance, have you noticed the increased number of earthquakes, tsunamis, these tragic events, strange weather patterns, sinkholes just mysteriously opening up. There have even been reports of sounds coming from the center of the earth that are very eerie. UFO abductions and they're being verified. Cattle mutilation. But it was supernatural, not just some crazy man doing it. Mystery codes being revealed in the Scripture that's predicting the future, mystery of the Mark of the Beast. L.A., I can see how God handpicked you to do this investigation. Because you see, L.A. was raised Catholic. He was disillusioned and he had never seen the supernatural. So what happens the first supernatural he sees, he thinks it's good, but it's not. It's demonic. He gets involved in the new age and he goes through a whole maze in that, and he gets pretty high up with a Maharaja and he's in an ashram, and he's part of this Maharaja's orchestra, does a 10-city tour. And then the highlight. They come to the Houston Astrodome. What was the purpose of them coming to the Astrodome?

L.A.: It was the gathering of all the devotees of Maharaja into the Astrodome. Numbers were sort of, the expected like tens of thousands of people. It wasn't the case. They probably had about 20,000 people. But the purpose was, it was called Millennium, and we were told that this was going to be a life changing event. And it was life changing for me only because I saw something when I was on that platform with the orchestra that night that sort of gave me a hint that maybe what I was looking at wasn't what I thought it was.

SID: What did you actually see? I mean, you weren't looking for this. But you had a revelation of, there was something there beyond the people.

L.A.: There was a large platform, which was the stage, and behind the stage was a dais. And the holy family was perched on this dais with the girl on the very top most part of the dais. And this was in an evening service. The crowd was applauding and just lots of energy from the crowd, and the orchestra played and got the crowd warmed up. And then the guru came out and had this big crown thing on. And I remember my friend nudging like this and said, "Take a look behind you." And I glanced back like this. Now here were the members of this so-called holy family, the

mother, a few brothers and the girl on the highest part of this dais. And as I looked at them, I had no words to describe this or no dialogue to articulate it as I'm doing so now. But they did not look entirely human. And what I mean by that, they were human, but there was a power that was emanating, coming through them. And I didn't ascertain or couldn't ascertain at the time whether the power was benevolent or malevolent. I just saw power and it was overwhelming.

SID: Okay. So he left that organization. He decided enough with this craziness. I'm going to go into business. Things didn't work out too well. He gets a hold of a book. Tell me briefly about that book.

L.A.: I was sort of at the nadir of my journey and a spiritual lock looking for something. And I was 30 years old and I was reading book by David Hunt called "The Cult Explosion". And as I was reading that book I was going Silva Mind Control, in there. EST, looked into that, all sorts of gurus. I just went like a checklist going through each of those things. And at the back of the book is this little prayer. I'm alone in my room. There's nobody on television exhorting me to accept Yeshua as Lord and savior, none of that. And I just read this little prayer and this was it. I just said, look, I don't whether you're real or not, but if you are, come into my life. I braced myself like this and kind of waited, looked around and nothing happened of course.

SID: I had that same experience, and here's what I thought. Well I guess it didn't work. Maybe it worked for someone else. It didn't work for me. But what happened?

L.A.: Well about a month later I awakened from an extremely troubling dream. It shook me. The dream shook me to my core and I woke up just bawling. And that was the beginning of sort of the taking me out of the kingdom of darkness or all the occult stuff I had been in and moving me away from that into another dimension or another paradigm, as it were.

SID: And you know, even though I thought and L.A. thought God didn't hear that prayer because we didn't feel anything, we didn't see anything, we didn't sense anything, God heard the prayer. And the same thing happened in my life, literally. The Spirit of God flooded my room and I have never, I don't understand a backslider. But what I believe, L.A., is that people that are involved in the dark side that then have a tremendous transforming experience, perhaps like Saul of Tarsus, who became Paul the Apostle, we have like a supernatural sense for the demonic, knowing whether something is demonic or something is of God. Are you finding this true in your life?

L.A.: Absolutely. I mean, everything that I work on and all my research in investigative reporting, it all comes down to looking at what is happening. Let's say, for instance, something manifest. What I mean by manifest, it appeared in Cairo about two years ago over a Coptic church. And what it was, was these light figures. It was so overwhelmed by this thing and it made sure all the power of this town was completely cut out. But guess what? Even though there was no electric power, these entities, these light entities appeared over this Coptic Church and did so for about two weeks. Thousands of people thronged to this area to look at the phenomenon that was going on. But see, no one tested the spirits. No one, well what is this thing? Everyone just assumed it was a benevolent aberration. Not so fast.

SID: You know, when we come back I want L.A. to talk about these people that are being abducted by so-called flying saucers and what does he think this power is. But the thing that is so amazing is they're putting implants in people. And he has actually talked to the doctor that has removed these implants, and he has amazing information. Don't go away.

*We now return to **It's Supernatural**.*

SID: Hello. Sid Roth here with L.A. Marzulli. L.A., I am so intrigued with these people that are being interviewed that say they've been abducted. Tell me about this doctor you spoke to, Dr. Lear, who started out as a skeptic of this whole phenomena. He's a surgeon. Tell me about him.

L.A.: Lear was asked by a friend to go in and look at this patient who claimed to have some sort of an implant or whatever, something under his skin. At first, Lear figured it was probably a wire or maybe a bee-bee from a childhood accident or something. But when he found out that the person was claiming to have been abducted by so-called aliens, he did an about face and walked out of the room. Didn't want anything to do with the stuff. And in some ways who could blame him. So he goes in reluctantly. He's sort of persuaded to come back. He looks at the X-rays. Yes, there seems to be something there. So he decides to operate and he goes in. And to his absolute astonishment, what he discovers is a very small metallic implant, but over this implant, and this is obviously a magnification, I'll use my fist, is a secretion, a membrane of some sort. And he takes his scalpel and he tries to cut this membrane and he can't cut it. He then takes a forceps and goes in and yanks this thing out, and it comes out, sometimes, he's done 16 of these things since. But it comes out in two or three pieces. What he's discovered is when you take these things out and you put them in a Petri dish with the patient's blood and you just leave them and the pieces lets say are separated by a half an inch or an inch, come back 24, 48 hours later, the pieces have tried to assemble themselves. How is that possible? These implants are giving out a clock speed of a frequency, which we believe is a saw tooth, which means it's a computer wave. It's a clock speed at 300 gigahertz, which is a hundred times faster than the fastest computer we have on the planet. Inside these things are carbon nano tubes not found in nature and other compartments. We have no idea what they're doing. But I asked Lear, I said, "In your professional opinion, what do you think this implant is?" And in sort of a gruff, I'll do my best imitation, "Well they're changing the person's DNA." But that's what he believes.

SID: Did you hear that? It's literally going to change a person's DNA. This sounds way beyond robots and way beyond any science fiction things I've ever seen. What is the source, in your opinion? Are there really flying saucers?

L.A.: Well there's two paradigms a person can embrace. One is the extra terrestrial hypothesis that these are entities from the Pleiadian star system or Zeta Reticular, or pick your place, and they're coming here. They're our overlords. I call it the coming great deception, that they created all life on this planet. They genetically manipulated early man. They started our civilizations. Now they're back at this critical juncture in human history to usher mankind into a time of peace, prosperity and knowledge. That's one.

SID: Okay the science fiction people go that way.

L.A.: Right. The new-agers go that way.

SID: Alright. What's your opinion?

L.A.: I believe that they're inter-dimensional beings. They are highly malevolent. They are pernicious. They are evil. They have an agenda. It goes back to what we read in the Book of Genesis, Genesis 6, the sons of God, the Elohim, the fallen angels saw the daughters of men and chose for them wives, and the hybrid was a Nephilim. Isn't it interesting that Yeshua says that, "In the days of Noah, so will be when the son of man returns." Why is he signaling the days of Noah to us? Why is he pointing at the days of Noah? Because something happened there that is unlike any other time in all history, and that is the presence of the fallen angels openly presenting themselves on the earth. And I think we're moving into that time.

SID: You've investigated, I don't think there's ever been a time in Planet Earth there's been so many different supernatural phenomena. And most people have not seen the evil or the good, the God or the demonic. So they're setting themselves up for a big, big fall. L.A., another thing that intrigues me immensely is the discoveries of Torah codes. Explain briefly what that is.

L.A.: What briefly, this is Torah Code 101. If we take the Book of Genesis written in Hebrew and you were to do an equidistant letter sequence, we can do this by hand, and you go every 50 letters, it will spell "Torah".

SID: That's amazing.

L.A.: Yeah, it is.

SID: Do you know, I interviewed a man that did Bible codes, and I said, show me. Look my name up. And I was shocked. Do you know they not only found my name, the name of ***It's Supernatural***, but they found the name of my wife, her middle name. She has a unique middle name. I've never even heard of anyone beyond her mother that had that name. It's thoroughly, I mean, that was in the Bible codes. I am not a skeptic of these things. They recently found President Obama in the Bible codes. What did they find?

L.A.: They did. If you go to Ezekiel 38, Chapter. 38.

SID: Ezekiel 38?

L.A.: Ezekiel 38.

SID: I've reviewed the headlines.

L.A.: Absolutely, definitely. I'd love to talk about that. And you can do this without a computer. So you don't need a computer to do this. You can just go to Ezekiel 38. If you can read the Hebrew it spells "Obama".

SID: In that passage of all the things that seem to be happening right now, President Obama's name was there?

L.A.: Yes. That's incredibly bizarre. He's the president right now, obviously, and we see in front of us these nations. Remember, this prophecy has laid dormant collecting dust for 2600 years. And all of a sudden in the age that we are in, we see Israel regathered back from the four corners of the earth, reestablishing its ancient homeland. They are truly a nation living without walls or gates, any of that stuff, and they're basically dwelling in safety.

SID: You know what's so amazing? Is these Bible codes even have predicted the future and they've come true. I'll tell you what, when we come back we'll talk about it. Don't go away.

[music]

*We'll be right back to **It's Supernatural**.*

[pause]

[music]

*We now return to **It's Supernatural**.*

SID: Sid Roth here with L.A. Marzulli. L.A., we're talking about the Bible codes, which are fascinating. But what if you took another large book, like say, "War and Peace", and looked for predictions in that using the Bible code? What would you find?

L.A.: It doesn't work, plain and simple. It just doesn't work.

SID: But there are things predicting the future. For instance, Prime Minister of Israel, Rabin. Tell me about that.

L.A.: There was a Bible code that was done with Yitzhak Rabin. And in a very tight grouping of letters, "Yitzhak Rabin, assassin will assassinate." This was done primarily before the event.

SID: That's pretty specific. It even gets wilder than that. Someone found it and went to the Israeli authorities, but obviously they didn't pay any attention. What about the Bible predicts there will be strange signs in the skies. Tell me a few.

L.A.: Well certainly we're looking at objects around the sun that NASA seems to redact those images from the Soho twin satellites. Redact, meaning they brush them out several hours after researchers would look at them.

SID: Why?

L.A.: Good question. I don't know the answer to that.

SID: Tell me about the moon.

L.A.: When you look at films from YouTubers all over the planet who were looking up at the moon, filming the moon and going, hey, I'm not an astronomer or anything, but I'm looking at this body and it's not where it should be. It looks different. It looks weird. Well if one person says that you kind of dismiss it. But from all over the globe, people are reporting the same phenomena. So we did some research on it, my partner and I, Richard Shaw. And what we discovered was a paper by an Italian scientist by the name of Lorenzo Iorio, and he wrote a paper called, "The Eccentricity of the Lunar Surface". He thinks that there's a large body coming into the solar system, which is perhaps making the moon act in an erratic way.

SID: There was actually a Torah code about the moon in that particular year. Explain that.

L.A.: Well the Torah code, which is really interesting, because when this was all happening, my partner Richard Shaw sent it to the rabbis. And so they did a Torah code, and it said, "The moon will be observed in the day," basically 2011. Anomalies in the lunar surface will be observed in 2011. So the Torah code sort of corroborated what we had been investigation, which I found absolutely fascinating.

SID: He has an ending of the Mark of the Beast I've never heard before, and it rings true. I think it's historic what you're going to share. Will you do that right now?

L.A.: I'd love to. Thank you for allowing me to do this. We see in Matthew 24, Yeshua states something, "As in the days of Noah so will be the son of man returns." We alluded to that before. What differentiates those days are the presence of the fallen angels. But there's also some other dynamics in that passage which we overlook. One of them in particular is the length of lifespan, five, six, seven, 900 years old people lived, and I believe that's literal. They lived to 900 years or older. Hold that thought. Then jump over to the Book of Revelation. It says, we all get this one, that, "Anyone who takes this mark will not be able to buy, sell or trade." That's an easy one. But then we find out that anyone who takes this mark, whatever this thing is, grievous sores will appear over the body. Then we find out in the Book of Revelation also, anyone who takes the mark is immediately thrown into the lake of fire. There is no grace. There is no mercy. It's just, you got the mark, bam, you're in the lake of fire. Not my words. Those are the words of Yeshua and those are in the Book of Revelation. A little further on we read something which is not necessarily tied into the Mark of the Beast. But here's the deal. It says that in those days, the days of the mark, men and women will seek death and not find it. How can that possibly be? I've held a chip from Dr. Lear in my hand. I've asked him point blank, what is this thing doing? It's changing the DNA. This thing, and this is how they're going to do it.

SID: This is the chip that people going into flying saucers, have the surgery.

L.A.: Right. These are prime contacts.

SID: By the way, did this doctor find that these people were loonies?

L.A.: No, not at all. All these people that had been abducted, most of them, I would say well over 90 percent do not want any notoriety. In fact, they seek anonymity. They're not interested in any type of [unintelligible].

SID: Why doesn't the U.S. reveal all the information they have on flying saucers? Other nations have done it.

L.A.: Well the other nations have done it. Greece, the United Kingdom, France, Belgium, Germany, Japan, Mexico, Brazil, they've all released what were one time top secret documents. We don't do it and I think the reason is simply this. They fear some sort of a backlash, religious backlash. What happens if people all of a sudden find out that maybe the God we've all believed in isn't. This is what I call the great deception, and I believe it's been orchestrated for thousands of years.

SID: Okay. Let's go back to this changing the DNA thing. Why would someone want a chip inside of them?

L.A.: Here's the scenario. Let's say there's an upcoming war in the Middle East and we see some sort of a nuclear holocaust. Remember, this is just a scenario. Okay. So we see a nuclear event in the Middle East, perhaps in this country, and all of a sudden, mile-wide UFOs begin to manifest, begin to appear all over this planet. How is that going to affect everyone? They'll come with two things. They'll come with a free energy source and they will come with a chip, and this goes right back into what Matthew 24 states. They will come with this implant which when you take it will usher you, bring you into as a member of a new world order. And when they scan this thing, not only will it have its medical records, but it will change and correct your DNA. That's what we'll be told, correct your DNA.

SID: So it will allow you to live longer.

L.A.: You'll live to 500 years, disease-free. All this...

SID: So who's going to say no? Only someone that knows the Lord. Only.

L.A.: Exactly.

SID: And you can see why they'd be enemies of the world...

L.A.: We'd be looked at as Neanderthals. How can you possibly believe in this ridiculous mythos of a Judeo-Christian God? Why not just take this mark and live disease-free for 500 years. It sounds like a great deal. Look, I've held it in my hand and this is what I think is coming.

And it's the only thing which fulfills all that criteria, which we just spoke about that's found in the Book of Revelation.

SID: And as far as timing, isn't it interesting in this whole scenario of what we see shaping up right now with the nations coming against Israel, is on the horizon with Obama's name in the secret code. It shows you how soon it will be that the Messiah is going to return. Tell me about the rapture vision you had, real brief, because there is a blessed hope.

L.A.: I didn't seek this in any way. I was getting ready to go in the shower. So unlike our last guest I didn't fast or pray or any of that stuff. I was just getting ready to go in the shower. I was not in the body or out of the body. I can't tell you, just like Paul says. All I know, I was snatched up. I found myself in the heavenly scene. I was there for three seconds, one second, two seconds, three seconds, bam, back again. Second one, I look around and I can see that we're not sandwiched in like sardines, that there's 20 to 30 feet between myself and other people. We are all looking in the same direction. That's second one. Second two, there was a holy reverential silence which permeates the entire scene. You can hear a pin drop. No one is asking, gee, where are we? There's none of that. Everyone knows exactly what's happened. It's a holy, I can't even describe it, the best words, holy reverential sound. The stillness is unbelievable. Second three, I realize to my utter amazement that my sin nature, what I mean by that, is all the little nasty stuff that we do that crops up even though we don't want it to. It just crops up and sort of eats at us, our anger or our bitterness, whatever it is, all that was gone and I was liberated. That's in three seconds and bam, I was back and I wept.

SID: Let me tell you something. This has never happened to me before. But a few days before this interview I woke up from a dream, and this is what I was saying in the dream, "Jesus is coming soon. Jesus," I said it three times, Jesus is coming soon. I say to you, Jesus is coming soon. Are you ready?

[music]
