

SID: Hello. Sid Roth here. Welcome to my world where it's naturally supernatural. My guest has seen tens if not hundreds of thousands people healed all over the world and he said he has found when he shows specific videos of people being physically healed it increases the expectancy and more people get healed. I mean, just the most outrageous miracles. Anyone interested in seeing this video? Me, too.

*Is there a supernatural dimension, a world beyond the one we know? Is there life after death? Do angels exist? Can our dreams contain messages from Heaven? Can we tap into ancient secrets of the supernatural? Are healing miracles real? Sid Roth has spent over 35 years researching the strange world of the supernatural. Join Sid for this edition of **It's Supernatural**.*

SID: When people see this video tell them what has happened and what you expect to happen.

RANDY: I believe that out of the million families or households that have the opportunity to watch this in the next week that how many ever watch, at least one-tenth of you, are going to receive a healing during this program today, not a year, or not a month, not a day after, but even today. People get healed without, before there's prayer, and then more get healed when there is a prayer. So I believe as you watch this video and you see what God has done it will create faith in you and there will be a sovereign visitation, and there's going to be a lot of people get healed watching the video as well today, even in our audience here.

[begin video]

RANDY: There's no sign of any lump? It's gone? And she's completely healed. Believe in miracles. Believe in miracles. She felt she needed to go to the bathroom. She went to the restroom and she said she didn't even have time to go to the toilet. The stones went through.

Woman: He lost his hearing a hundred percent in both ears and the doctor said my case is irreversible. There is no way to heal this.

Man: [foreign language]

Woman: But I believe in Jesus Christ. I didn't believe in what they said.

Man: [foreign language]

Woman: I believe that he would do this miracle for me. He said, do you realize this, I'm talking to you both and I'm not wearing the hearing aids.

RANDY: This woman has from the knee down to here, a bar and 12 screws. She has to walk with crutches all the time.

Woman: She couldn't bend her knee.

RANDY: She could not bend her knee.

Woman: I knew today was going to be my day. I want to run. I want to run! I want to run!

[applause, cheers]

Woman: Yay, Jesus! You said, you don't get it, the doctor said you're not going to be healed. You're going to have to amputate your leg if nothing changes.

RANDY: When we first started praying it's like instantly within five seconds, power hits her leg.

Man: And now look what he can do. He can bend his knee, all that and raise his hand. Hallelujah. Total healed, 31 screws totally healed. Hallelujah. And 16 screws inserted on her back, 16 screws. She could not bend and she had constant pain. All the pain is gone and now she can go to move when she couldn't do before. Hallelujah.

RANDY: Eight screws and two metal bars in his neck.

Man: And he couldn't do this.

RANDY: Four screws and two metal bars.

[applause, cheers]

Man: Hallelujah!

[applause, cheers]

[end video]

SID: I know you appreciate what God has done that you've just seen before your very eyes. I mean, people that have metal inserted in their body cannot bend. Do you realize metal, you can't bend the metal in your back and in your neck.

RANDY: But we had 5000, almost 5800 people reported their healings since 2009.

SID: This is the metal.

RANDY: Of just the metal issues, yes.

SID: Now according to my understanding of the Greek in the New Testament, there are gifts, the word is plural, of healings, plural. And some people have great, like you have great anointing for this. But there was something that was bothering you. After 30 years of praying you didn't see one person healed of a stroke. So he goes to see a person that's been a guest on our show, Heidi Baker in Mozambique, and he saw something that even at this point in his walk with God stretched his faith. What did you see?

RANDY: I saw people, several people who had been raised from the dead. I met the people who prayed for them to be raised from the dead and I visited the villages that so many had come to Christ even in Muslim villages because of these dead resurrections. So that changed my perspective when I was praying then for people with stroke. Because if you've been dead, and a lot of them had been dead for hours, he has to rebuild the whole brain, a matter of fact, the whole body, all the cellular structure. So the possibility of strokes being healed just encouraged my faith. And then we saw three in 24 hours.

SID: Tell me one of the three that you saw. Tell me about it.

RANDY: I want to, actually two, a man and a woman got the same thing, paralyzed on the left side, claw hand, but the woman can't speak. It affected her speech. And she was Catholic, but she had come to this Pentecostal meeting. The other guy wasn't even a Christian. He had come and we prayed for an hour before the service started and during the worship, about 45 minutes, my team and I. And both of them, right before I started preaching, worship still going on, I looked out and there was the man weeping, his hand no longer a claw, clapping. And the woman in the back with her little veil on, clapping and singing, and both of them in the same night had been healed of stroke, and they were paralyzed on the left side. We've seen two people healed with very bad schizophrenia, we have seen people with bi-polar, we've seen people with Parkinson's, we've seen people with MS, all dealing with the brain, get healed. So I think it will be more than just stroke.

SID: There's something that I have to ask you and that is people sometimes feel a fire of God on them. Sometimes they'll shake and then they'll be healed. Does someone have to feel anything to be healed?

RANDY: Thirty, 40 percent of the people we pray for don't feel anything, that get healed, and they don't know they're healed until they try to do what they can't do, which when it comes to the metal issue, a hundred percent of the people that I've studied, they were healed when they tried to do what they couldn't, not before.

SID: So there is a faith element involved.

RANDY: Yes. And I just want to encourage the people who are watching, too, during the show, at the end of the show, to try to do what they can. Just don't try one or two times. Take at least half a minute to a minute to continue. Because the Lord actually says there is something about not being passive, being active.

SID: And you're finding that now when you speak it out people are getting healed before you even pray.

RANDY: Yes.

SID: That's amazing.

RANDY: I was in Brazil a few weeks ago and I was speaking, and I got hit right here like somebody with a little hammer hit me. It hurt so bad. While I'm speaking I go "ow!" Well I knew somebody was going to healed of it. Before I could even say somebody is going to get healed of it, the person who saw me do that had that condition. If he did his hand, like the pastor told me, if he did his wrist, there's a big scar across here, motorcycle wreck, pins, plates, and when he'd do that a pin would stick up. You could see it. It actually made me kind of sick. Totally healed. There's nothing there now. You do that, nothing sticks up. No prayer. He just got healed. As soon as I said it he got healed.

SID: I'd say that's worth it. You were talking about the manifestation thing, tell me about the person with AIDS.

RANDY: This happened in the United States in Englewood, Florida. A guy had, he had AIDS and he was in hospice, a few weeks to live, in a wheelchair, patch, seeing double. This is my first time to this church and I prayed. I prayed for him. He didn't feel a thing. And when I finished interviewing, there was no change. He didn't feel anything. But when I went back about ten months later, this guy came up to me and he said, "Do you remember the guy you prayed for who had AIDS?" I said, "Yes, what happened to him?" He said, "That was me." He looked so different. And he told me he didn't feel a thing, wasn't any better, wasn't any better the next day or the next day. But on the third morning he woke up feeling stronger and just continued to get better. I went back and he was totally healed of AIDS and had several children.

SID: I'm so excited, Randy. You want to clear the rubble that you probably learned the hard way, too. For instance, you came from a background that believed that miracles didn't even exist today. Tell me what's wrong with that thinking.

RANDY: Well it's not biblical.

SID: Well that's a good answer.

RANDY: Scripture actually teaches against that. You know, some of the rubble that I felt like needed to be removed, one is the gifts of healing and miracles is not for today, that's one. Thorns in the flesh, that wasn't sickness or disease. That was, there's only three kinds, the thorns in the flesh, eyes and the sight is mentioned in the Old Testament. Paul would have known that. And every time it was never sickness. I think sickness is your cross to bear and if you think God gave you the sickness it's hard to believe to ask him to take it away.

SID: And if you think God gave you sickness, why in the world would you go to a doctor to get better, to get the gifts God's given you?

RANDY: Yes, totally inconsistent.

SID: There's all the rubble. Explain to me where you got that word "rubble" from.

RANDY: I was preaching at a charismatic Lutheran meeting for the International, and the Lord said, "Don't preach anything you've ever taught. Teach about Nehemiah, Israel, going back and

rebuilding the wall of Jerusalem." But before they could rebuild the wall they had to remove the rubble. And they when I wrote the book, "Healing Breakthrough", I knew that would be the first half of the book. But it's not enough to remove the rubble. You still got to build the wall of faith. And so it's teachings and practices in both that actually contribute to an atmosphere of faith, not in a magical way, but just understanding the ways of God. When we understand the ways of God, Moses said, "If I'm found favor in your sight, show me a way or teach me your ways that I may know you." We know God better when we understand his ways because we'll recognize his footprints, when sometimes we wouldn't see them, or his thumbprints if we don't understand his ways. In the same chapter, he says, "Now show me your Glory." I believe, Sid, there is a connection between seeing the Glory and the number one way God glorifies his name, is by what he does. So we want to see his ways so that we may see his Glory.

SID: How do we create an atmosphere for miracles?

RANDY: Well when I wrote "Healing Breakthrough," I thought, what do I do in the meetings? Why do I do those things? What's the reason behind it, sanctified reason, not reason that's controlled by what we think is possible, but when everything is possible. And then I tried to write those things in my understanding. Faith is created when we recognize what God is doing in the meeting and are able to communicate that. Once we know it's his will in that meeting to do those special things, it's like he's priming the pump. Once the water starts to flow and people start to see the miracles taking place then other people start having faith just because of what they're seeing God do. And so usually he will show us things by words of knowledge or understandings, or testimony just as we show the video. The woman, the power making her move, she had watched that video of a guy with about 14 people, who had metal in her body, and she felt heat come on her knee and leg. So she was, God was creating faith in her. And so by the testimony and by words of knowledge, and by seeing what God is doing in the meeting, and sometimes feeling his presence, some people feel heat. They actually do, not everybody, or they feel energy coming into their body, or they begin to feel all of a sudden my pain is leaving. That encourages their faith, especially if they know that that's a sign of healing.

SID: Randy, I'm going to tell everyone what's going to happen. When we come back, I'm going to turn Randy loose, more importantly, the Holy Spirit loose, and in your homes and in the studio audience I am expecting amazing miracles, and I keep seeing the teeth being healed. Be right back.

*We'll be right back to **It's Supernatural**.*

*We now return to **It's Supernatural**.*

SID: Randy, you said it's vital for us to know that healing belongs to us. What did you mean?

RANDY: Well I believe that healing and deliverance is the children's bread. It belongs to the covenant people, particularly, but God will also heal even people who are not Christian as one of the ways he evangelizes. He's a great evangelist. It's the children's bread, but it's also in the cross, the same words that is used for sickness and disease was used to bear our sins and our iniquities,

exact same words. So at the cross, he took not only our sin and our iniquities, but our sickness, our pains. St. Jude says our diseases. And so I want them to know that healing is yours and it's not only healing is yours, but the ministry of healing is yours as well. It's in the great commission. We're to teach you to obey everything Jesus commanded his disciples in healing and deliverance was at the top. So I actually believe right now God wants to do some healing in here, and those that's watching. Before I came in a while ago, my right kneecap hurt so bad I could barely walk. There's nothing wrong with my kneecap. It's one of the seven ways you can get a word of knowledge, and usually when they hurt that bad it's something big. So I don't know if it's someone here that has a problem in the right kneecap or if it's somebody that's going to be watching, but it's going to be either a lot of people or it's something very, very big. So I believe the Lord is going to heal that. I was talking to my intern who's here, Brian over there, who's 25 years old, he felt like God is going to heal somebody that has something wrong with their neck. And I feel like there's going to be some people healed that has even an issue of metal and surgery in the neck. As far as that goes, I just feel like every time we do a meeting, we just go for metal and several other things. Lately, we've been seeing, five out of the last six women we prayed for who had psoriatic arthritis were healed. So if you have, those that's watching, if you have, and those that's here watching, if you have any of those things or you feel the heat of God come on you or the power of God beginning to go through you, and as I said with Sid a while ago, you don't have to feel that to be healed. And a lot of people don't know they're healed until they try to do something they cannot do. So I'm going to ask if any of those things apply to you, for you to stand right now and begin to do something.

SID: And oh by the way, you stand. You're not Swiss cheese. You stand at home. I'm looking at you. More important, God is looking at you.

RANDY: Yes. I want to give you—

SID: Excuse me, add stroke. We talked about that earlier.

RANDY: Yes, we talked about stroke, anything dealing with the brain, MS, Parkinson's, mental illness, stroke, learning disabilities, whatever it may be.

SID: Do you have much results with cancer?

RANDY: Yes, we've seen several people healed of four stage cancer, so whatever it is that you have.

SID: Let's stand up right now.

RANDY: I am going to ask that you try to do something that you can't do, that you actually do something, test it out. And at home, you do the same in your living room, wherever you're watching the TV at.

SID: Let me add one more thing, because every time I minister, this happens. If you have a pain in your neck or back you'd better stand up unless you want to end up being a pain in the neck. No.

RANDY: Even as you were saying that I felt somebody has got pain. It's above the left ear in the head and it starts right behind the ear, and it kind of goes through the head. Now check out your body. Now we're not asking if you're a hundred percent because we've had only a few, it hasn't even been a couple of minutes. But if you're at least 80 percent improvement or function restored, I want you to wave both hands over your head to your wrist cross, like this.

SID: There are a few who are waving.

RANDY: One, two, three, four. Just stand and wave if that's you. There's about five people already. Now if you're not at least 80 percent, but you're getting better, you're improving, would you wave one hand at me. Okay now, I'm going to pray. We haven't prayed yet. Father, I just want you to see God heal people before we pray. Father, in the name of Jesus, we thank you for the ones that you are healing that are least 80 percent or more. But these, Father, the last ones that just raised one hand, we're praying and agreeing, and saying amen to what you're doing. And in the name of Jesus we speak to their pain, and we invite the power of your Kingdom to come, the Gospel of your Kingdom, the power of your Kingdom, establish your reign over sickness and problems. We thank you for your miracles, miracle power. I command pain to leave, conditions to be healed, the energy of God to go through your body for the Glory of God in the name of Jesus. Now, check it out again, all you watching, whatever you're watching, whatever you're watching, whatever room you're in, check it out. Those who waved one hand, now if you're at least 80 percent, you couldn't wave your hands a while ago, but now you can, wave them high over your head. There's one, two, three, four, five, six, seven, eight, nine, ten more. Thank you, Lord. Thank you, Lord. Now I just believe, I actually believe, because we've seen God do this, not only will there be people healed the first time you run this, but there will be people get healed in the reruns.

SID: Oh I'm sure of that.

RANDY: It could be a year from now this thing is being shown and God will use the Word and use the testimony, and bring healing.

SID: Okay, one last word. Pain in the hip area, you're being healed or even a new hip. You just stand up and walk around a little bit, you'll see it's gone. Now the healer is not Randy Clark and it's not me. The healer is Jesus, and in Hebrew, Yeshua.

RANDY: Yes.

SID: Next week on *It's Supernatural*.

Hello. I'm Sid Roth. I want you to join me on *It's Supernatural* with my special guests Dr. Michael Brown and Dr. Sandra Kennedy as we share one of the greatest ways to be mentored in

the supernatural. And I'm telling you this is so spectacular. You can't miss this show. If you do, you may miss 45 years of what I've been taught by my guests on *It's Supernatural*.
