

Hello. Sid Roth here. Welcome to my world, where it's naturally supernatural. I've read of burning books on magic arts in the Bible, but for my guest's new age and occultic books to disappear into thin air when she accepted Jesus, oy vey. Interested?

*Sid Roth has spent over 40 years researching the strange world of the supernatural. Join Sid for this edition of **It's Supernatural!***

**SID:** I have Carlie Terradez here. Carlie, you were not raised in a Christian home, but at 14 you went to heaven.

**CARLIE:** I did. I did.

**SID:** Tell me about it.

**CARLIE:** Well, at the time I had just chronic asthma and I'd had a really serious asthma attack and landed myself in intensive care. And during that time there I actually died and had an out of body experience. Now I wasn't raised in a Christian home so I didn't have the language for it. But in that moment I remember looking down on myself, looking at the doctors working on me, shining their torches in my eyes, their flashlights and just being moved, kind of like I was floating, really. Just kind of floated through a doorway in the hospital room there and just really entered a long, long, bright light and just felt just love and peace.

But as I was traveling down that hallway in then, in towards the light, I felt drawn to the side to some large gates. And as I was standing in front of these huge golden gates and a figure appeared in front of me. And that was the first time when I noticed that I had on a white robe. It wasn't a hospital robe, it was a white robe with my bare feet and standing in front of me, it was a figure that put his... he just put his finger on my chin and lifted my head up to his face. And his face just shines so bright. And I didn't realize then that I was meeting Jesus. I didn't have the words to describe that. He just, he knew me. He knew everything about me and he said to me, "It's not time. It's not your time." And I woke up and I was back in the hospital bed.

**SID:** And this, she now has just a passionate, something inside of her just to find this one that exuded such love. But she started looking because she had no paradigm on Christianity. She started looking into the new age and got deeper and deeper into...not the same thing. And so she cries a desperate prayer. What happened?

**CARLIE:** I just said, "God, if you're real, I need to know and I need to know you're real." And the doorbell rang and I ran downstairs and opened the door and there was a vicar standing there with his black shirt and the white dog collar on.

**SID:** A vicar is like a priest.

**CARLIE:** A priest. Yeah, priest from the Anglican church. And he was standing there with a tract in his hand and it had a big red question mark on it. It said, "Why Jesus?" And he didn't even get a word out. I just snatched that booklet from his hand and slammed the door in face. I

just knew that was my answer. And I ran upstairs to my bedroom and I read all the way through it and I accepted Christ, prayed the prayer salvation on the back and just felt the presence of God.

**SID:** What a wonderful testimony.

**CARLIE:** That was the easiest doorstep conversion ever.

**SID:** Now, what happens to your collection of new age and occultic books?

**CARLIE:** Right after I was born again, those books just disappeared from the bookshelf. No one touched them. No one threw them out, they were gone.

**SID:** Now, for the first time, when you recognize God was speaking to you, you were at a woman's Bible study and you told me that you were suffering from epilepsy. How bad was it?

**CARLIE:** I had three or four seizures every day and it wasn't safe. Sometimes my husband will come home from work and find me collapsed or he'd get a call from the hospital from intensive care. It nearly killed me several times.

**SID:** So for the first time you recognize God was speaking to you at this Bible study. And what did he say?

**CARLIE:** During that Bible study it was with a different kind of Bible study than my usual church. And my friend was leading the Bible study and she actually just left time in the Bible study for kind of a time of meditation where in a sense where we would just listen and hear God and I'd never really done that before. And in that time was the first time I really remember hearing God on the inside of me. He said to me, "In two weeks time, you can be healed from this if you choose to be." And he set before me in my mind, I saw a vision of a light switch and he said, "I set before you life and death, choose life. When you're ready, just flip the switch and turn the epilepsy off."

I went home from there and I'm just like, "Lord, you know, I need to see, I need to understand what you're saying in the word of God." And for the next two weeks, the Lord showed me in the word of God how Jesus had a healing ministry and he went around healing all who were oppressed. I went back to that Bible study and in that Bible study my friend said, "I just feel like the Lord telling me I need to pray for you." So she prays a quick prayer and I just know in my mind I turned that switch. I turned epilepsy off. I went from taking 13 different medications a day and having three or four seizures every day to never having another one of them and that was 15 years ago.

**SID:** Now, this woman is as bold as a lion with the word of God. She knows. Carlie was bold when she needed healing for herself, but I wonder how bold she was when her three-year-old daughter had days to live. Be right back.

*We now return to **It's Supernatural**.*

**SID:** Carlie, tell me about your daughter Hannah.

Yeah. When our daughter Hannah was born she had an autoimmune disease and it's called Eosinophilic Enteropathy. It basically means that her body couldn't take any protein and digest it.

**SID:** That sounds awful.

**CARLIE:** It was horrible and she was three years old, but she was the size of a nine-month-old baby. Her growth was severely stunted. All of her hair fell out. She wasn't able to eat literally any food. She was allergic to absolutely everything. And so we had a feeding tube inserted directly, surgically into her stomach to pump her 23 hours a day with a synthetic formula. Not that it would cure her, but in the hope that it could prolong her life. And really at three years old she was sent home to die with a week to live.

So when Hannah was diagnosed, we thought, well, we know that God can heal, but does he want to? We had a misconception about the character and the nature of God, that God is really good and he only has good gifts and his will for us is always healing. And because we didn't really have that foundation, we prayed for Hannah. We were pastoring at the time. We love God. We were fanatic about God, but we really didn't understand that God is a God and the depths for which he loves us.

**SID:** But a CD or a tape got into your hands, that's kind of, your brain went tilt, Oh, I see.

**CARLIE:** Yeah. It was a minister called Andrew Wommack. And we came across a cassette tape and it was perfect timing and my mom had had it in her desk drawer, in her chest of drawers. Moved her several times, but she pulled it out. We just said to her... We were hungry for the word of God. We were in a desperate situation and we said, "You know, do you have anything? Do you have anything at all that can encourage us? We need to get the word in us." And she said, "Well, I've got this old drawer full of dusty tapes." And she pulled this guy out. We didn't know who he was. And that was the first time that we really heard the gospel of power.

**SID:** But the power of imagination came in because you saw something and held onto it tenaciously about your daughter.

**CARLIE:** She was three years old. She was laying in the hospital bed. Every day the doctors would come in and just have just a horrible report, always negative. And I just asked "Lord, I need to see it. I need to see what you're saying about Hannah. I know it's your will now for her to be well, but I need to see it. Give me a vision, give me a picture on the inside." And the Lord was so gracious. He gave me three visions and two of those we've seen come to pass. But right away

I saw her about four years old, so about six months in the future then riding a little red tricycle and the next one she was—

**SID:** When she was given a death sentence of two or three days.

**CARLIE:** She was in a vegetative state at this point. And the next picture was when she was five years old walking in a green school uniform through the school gates on her first day of school. And the third one and, was Ashley my husband walking her down the aisle on her wedding day.

**SID:** All right. You listened to this tape of Andrew Wommack, which builds your expectation. Then you found out he was speaking near you, in England and you took her to the meeting and he prayed for her.

**CARLIE:** Yeah, it was totally a God set up. We found out that he was only in the UK one day and it happened to be the very next day. So we got permission from the hospital to take Hannah out of the hospital and we went straight to the conference and Andrew Wommack laid hands on her and prayed for her and she was instantly healed. Two out of those three things we've seen.

**SID:** But I have to ask you this, when you saw those pictures, did you tenaciously hold onto them or did you say, I hope?

**CARLIE:** I meditated on those. That's really what kept me going because when we have to learn to develop spiritual sight, we have to learn to see by faith. We walk by faith and not by sight and faith sees the unseen. The imagination is so important. It's linked to hope and hope doesn't disappoint. Biblical hope doesn't disappoint. In fact, the word mind in the scriptures is also translated imagination. Our imagination. We need to start seeing ourselves the way God sees us. He sees us as the healer of the Lord. He sees us walking in health and in wholeness and in his power by his spirit. That's how he sees us. And when we start to agree with his picture on the inside of us, it's not going to be long before we start seeing on the outside because miracles start in the heart.

**SID:** When we return, Carlie will pray for you to flip the switch for your miracle. Be right back.

*We now return to **It's Supernatural.***

**SID:** Carlie, how important was praying in tongues or in a supernatural language to that woman that was healed?

**CARLIE:** As I was ministering to that lady and she didn't actually, her heart was so broken, she'd been sick for such a long time and hope deferred will make the heart sick. She was so disappointed about just struggling and not being able to receive. Then, when she came and met

me for ministry, she didn't actually want to tell me what it was even wrong with her. And she said to me, "I'm not going to tell you what's wrong with me. I just believe the Lord is going to show you." And so in that moment I'm distant. I just knew that I could only understand that by the power of the Holy Spirit. So I just spent just 30 seconds just praying in the spirit. And as I did that, one of the jobs of the Holy Spirit, as we pray in the spirit, he gives us wisdom and revelation. He reveals to us hidden mysteries, things that we couldn't otherwise have known.

And as I was listening to the Holy Spirit talking to me, I just heard the word liver. I just said, "I don't know if this means anything to you, but I just hear the word. I think it's from the Lord saying the word liver." And at that moment the woman just kind of broke down crying I thought, oh no, I've broken her. I was supposed to be helping and I messed this up. But she was crying because she had liver failure. And in that moment, as we prayed her faith rose on the inside of that woman, just as a result of me starting out by praying in the spirit. But one word of knowledge was all it took to raise that woman's faith to the point where she could receive and she walked away from that encounter completely healed.

**SID:** There's a phrase you use and I like it, Do not give a lie permission to land.

**CARLIE:** Amen. You know, sometimes we hear things and the world is always speaking to us. We live in a world where we're constantly bombarded with information. Some of that information is good. Some of that's just, just lies. It's not true. And we need to be careful what we allow to stand in our heart, to land in our mind. We cannot stop thoughts coming to us, but we don't have to give them permission to land. And, when it comes to our experience or even symptoms in our body, they're not the truth. There is a truth that trumps that. That fact. Amen?

**SID:** James 4:7, you say it makes you bold as a lion.

**CARLIE:** Amen. "Submit to God. Resist the enemy, and he'll flee from us." You know..."

**SID:** Say that again slowly.

**CARLIE:** "Submit to God. Resist the enemy and he'll flee."

**SID:** That's God's word.

**CARLIE:** Right. That's God's word. That's James 4:7. I said, I meet a lot of believers actually that have gotten the submitting to God bit down. They were okay with that. They submitted to God, but they don't realize when it comes to sickness and disease that we need to resist the devil. We need to stand against him.

**SID:** That word resist, that's a strong word.

**CARLIE:** It is.

**SID:** It isn't ignore, it's resist.

That's right. And passivity is like giving the enemy permission, consciously passive and hope he's going to run away from you.

**SID:** And so many Christians just think, well, God's going to take care of it. No, God already did 2000 years ago and you enforce it.

**CARLIE:** Amen.

**SID:** You resist. Okay, deception is the only weapon that devil's got.

**CARLIE:** He is. He's the accuser of the brethren. He is the father of lies. And there are so many people today that are sick because the devil has deceived them into maybe thinking it's even from God, that God's trying to put a sickness on them to teach them something. That's a lie and the pit of hell. Jesus had a healing ministry. He went around healing the sick, casting out devils, raising the dead. Amen? Everyone that came into contact, with Jesus every single time was healed, but we need to understand that the devil only comes with deception and with lies. But he needs our buy-ins. He needs us to agree with him in order for him to have any power in our lives. And the minute we resist him, we cut off his power cells.

**SID:** You say faith is like a muscle and we should not despise small beginnings and you illustrate it through the life of David.

**CARLIE:** The reason that David had the... We know David being famous for chopping off Goliath's head, but he faced a giant. Many people today are facing giants. They might be called different things, maybe called poverty or sickness or depression or whatever it is. Your giant says different names. The reason that he was able to run after Goliath with such boldness and such confidence was because he'd fought the lion and the bear first. He'd exercise his faith baby on some smaller things. And I just would encourage people today Sid, because sometimes people will be hearing programs like this and thinking, well, where do I even start? Where do I even begin? And you can know we can start exercising our faith on everyday things. Let's start exercising our faith muscles, not despising small beginnings, but next time we get a headache rather than popping a Tylenol, let's pray.

**SID:** But I'm reminded of this young girl, Carlie, that had a little touch of the reality of God but couldn't put it all together? Well, the truth is you'll never put it all together because you're not God. But I can tell you this, if you'll take that first step, he will run to you and he will put his arms around you. And there's some that are watching right now you need the love of God to put his arms around you. I want you to say this prayer so that God won't be just on the outside of you, but we'll live big inside of you. Dear God-

Audience: Dear God.

**SID:** ... I've made many mistakes in my life.

Audience: ... I've made many mistakes in my life.

**SID:** ... and I'm truly sorry.

Audience: ... and I'm truly sorry.

**SID:** I believe.

Audience: I believe.

**SID:** ... the blood of Jesus.

Audience: ... the blood of Jesus.

**SID:** ... has washed away every mistake.

Audience: ... has washed away every mistake.

**SID:** ... and I have a new beginning.

Audience: ... and I have a new beginning.

**SID:** And now that I am clean.

Audience: And now that I am clean.

**SID:** ... because of what you did, Jesus.

Audience: ... because of what you did, Jesus.

**SID:** ... I ask you now to come and live inside of me.

Audience: ... I ask you now to come and live inside of me.

**SID:** Take over my life.

Audience: Take over my life.

**SID:** I make you Lord of my life.

Audience: I make you Lord of my life.

**SID:** Amen.

Audience: Amen.

**SID:** Now it's time to flip the switch in reference to your healing. Anyone ready to have the light switch come on?

**CARLIE:** Father God, I just thank you for everyone that's watching this broadcast. For everyone that's listening to the sound of my voice. Right now in the name of Jesus, we take authority over every sickness, over every disease, over all pain. Right now we command sickness and disease to leave your body in Jesus name. I'm seeing brains becoming whole, neurological function returning to people right now in Jesus name. Alzheimer's is leaving. Parkinson's is leaving right now. There's arthritic conditions right now we released the power God in your body. We drive out arthritic conditions, every bit of pain, every bit of inflammation. We command in Jesus name limbs to move, joints to move right now in the name of Jesus. Lord, I thank you that your healing power is flooding through our brothers and sisters right now, from the top of the head to the very souls of their feet, that every ounce, every ounce of sickness, every ounce of disease is draining away from them.

Pain is leaving. There are bound joints that are becoming loose. We speak life back into organs that have ceased to function. I declare over every organ in your body full capacity, full capacity right now. Every symptom, every lying symptom from the pit of hell, we command it to leave right now. Woman, be loosed of your infirmity. Be loosed of your infirmity right now. I said I'm seeing a lady and she has a spine. She has scoliosis of the spine and those vertebrates are lining up. They're lining up. There's straightening coming. There's bones that are growing. Somebody has just holes. There's a weakness in your bones, like an osteoporosis, but right now those bones are becoming strong. There is bones where they was space between. Someone has knees. Someone's getting new knees right now where your bones were rubbing together, new knees are being created. This is Holy Spirit knee replacement.

Lord, thank you. Thank you that your power is flooding through us I see is here right now in the name of Jesus. Right now I want to declare an end to infertility. There are women out here, there are married couples who have been trying for a baby for years with nothing. You've had parts of your body removed, you have things that don't function, but God is doing a creative miracle inside of you right now. There's ovaries that are coming back to life. Right now we declare health and wholeness over your reproductive system and we declare the fruit of your womb blessed in Jesus' name.

**SID:** Repeat after me, I have flipped the switch.

**Audience:** I have flipped the switch.

[music]
